SpO2 / Pulse	Highest SpO2 : 100% Average SPO2 : 87 % Lowest SpO2 : 70% Awake SpO2 :99% <i>The Awake SpO2 is generated from the first five mins of testing as this time is assumed to be when the patient is awake.</i> Highest Pulse : 100 BPM Average Pulse : 97 BPM Lowest Pulse : 86 BPM
	SpO2 ≤ 88% : 00:28:19 SpO2 5% Protocol : 00:00:00 SpO2 ≤ 89% : 00:31:36
	<input checked="" type="checkbox"/> Group1 Qualifiers <input type="checkbox"/> Group 1 Qualifier (5% Rule) <input type="checkbox"/> Group 2 Qualifiers Group 1: Patient demonstrates saturation levels at or below 88% for five minutes or greater, taken during sleep, or a decrease in arterial oxygen saturation greater than 5% for at least five minutes, taken during sleep, with associated symptoms. Contact your local Medicare Contractor for more specifics on these diagnosis codes that support medical necessity.

Respiratory Assist Device (RAD): Sleep Oximetry demonstrates oxygen saturation ≤ 88% for five minutes cumulative of nocturnal recording time (*minimum recording time of two hours*) while breathing oxygen at 2 LPM or current prescribed FIO2, whichever is greater. If the patient meets Group 1 Qualifier and satisfies the above test condition, this patient is a potential candidate. **Check Local Guidelines**

Longest Continuous Recording : 00:13:54 Number of Continuous Events > 5 Minutes : 1

Sleep Disorder

Oxygen Desaturation Index(ODI) : A desaturation event occurs when there is a 4% points or greater drop in oxygen saturation, within a three minute window of onset. The Oxygen Desaturation Index (ODI) is calculated by the total number of desaturation events and dividing them by the valid time.

Events Per Hour (ODI) : 0 Total Desaturations (Entire Test): 46 Excluded Artifacts : 3

Patients with an ODI of 5 or more per hour should be evaluated for sleep apnea if your clinical judgment points in that direction. Two options are an In-Lab Facility or Home Sleep Testing through Advanced Diagnostic Solutions.

Oxygen Prescription

Tag tester Tester4 was seen on __/__/__ for which I ordered an overnight oximetry test. These results, listed above, show that the patient's SpO2 drops throughout the night & would benefit from home oxygen. I Tagvignesh Pandian, am ordering nocturnal oxygen at __ LPM, via nasal cannula, today as part of Tag tester Tester4 's plan of care. Once signed, please fax this form to HME Demo Account at (727) 264-2117.
